

... point

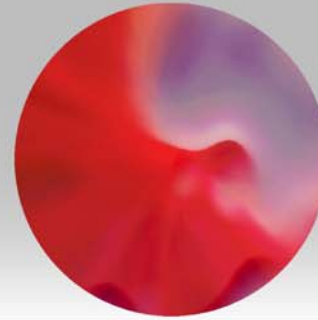

... squirt

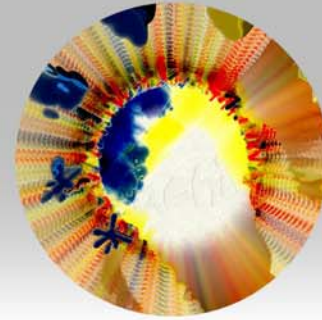

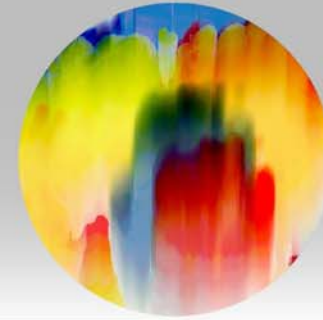

... spin

... and save

... every one an original!

... encourages creativity!

Combining art and science, **the Art Machine** is a brand new collaborative interactive for children and adults alike.

Users first select their colour by choosing one of the three primary coloured paint bottles. They then point their bottle at the circular canvas and press their squirt button. This creates a stream of virtual paint that drips, flows and combines with other colours in a startlingly realistic way.

To really mix things up, rotate buttons make the canvas spin at any speed, flinging the paint outwards into amazing patterns.

The masterpiece can be saved and – as a finishing touch – emailed home via an integrated touch-screen, providing an enduring memory of the visit and a link back to your venue.

With your own-branded **Art Machine** web site, users can upload their images and apply them to a huge variety of merchandise – from T-shirts to Teddy Bears, from posters to puzzles.

(visit [www.theartmachine.makemyMegastore.com](http://www.theartmachine.makemyMegastore.com) for examples)

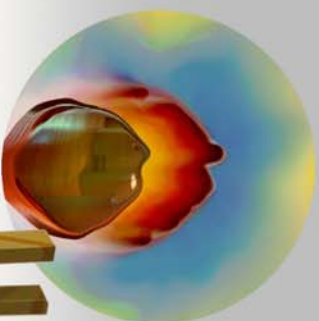

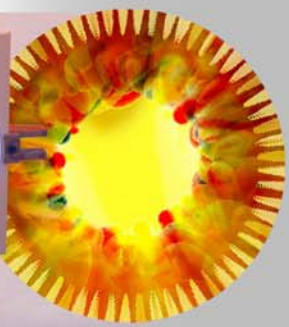

A showcase for colour theory, centrifugal and gravitational forces, a workshop in collaboration, a fascinating and mesmerising visual feast for users and onlookers: **the Art Machine** is all this and much more.

Designed to work with single or multiple users, **the Art Machine** is the perfect interactive exhibit for museums, science centres and art galleries.

**the Art Machine** generates comprehensive visitor data. Usage summaries - customised to your own requirements - are generated automatically and can be emailed to you at regular intervals

... a must-have interactive

# the Art Machine<sup>®</sup>

a collaborative  
interactive for  
all ages

... and so very  
MUCH more!

the Art Machine offers a wide range of customisation opportunities.

Including...

- Adding your own brand as a watermark on the canvas
- Including your own logo around saved artwork and on the linked touch-screen kiosk
- Creating a custom look and feel to a related on-line merchandising store.

We can also design, build and install a complete custom solution based around the Art Machine technology and your specific requirements.

the Art Machine canvas can be any size – from massive screens in large venues down to a single-user touch screen operation.
