SHOCKING ELECTRICITY! ELECTRYFYING!

EXHIBITS

- Circuits
- Jacob's ladder
- Wimshurst machine
- Electrolysis
- Frogs legs
- Magic lights
- Electric shocker
- Electromagnet
- Human battery
- Induction
- Switched on?
- Plasma globe
- Static domes
- Resistance is useful
- Transformer
- Electrical stimulator

This exhibition is composed of experiment-led exhibits that unravel the workings of electricity. Victoriana styling using forged aluminium and antique-look wood give this exhibition a dark, 'mad scientist' feel, which will be hard to resist.

This exhibition is part of Exploring Science, a set of hands-on, educational exhibitions created and operated by Science Projects in London, UK. Find out more on www.science-projects.org or call +44 (0)20 8741 2305
